Basic Data (excerpted from primary sources):

This mine is not listed as a new mine in 1933, and it may have been in operation prior to that time. The mine is listed as "not operating" in 1936. A Schorsch Coal Mine again is reported in 1939, and it is listed as a new mine in 1939. It is not known if the Schorsch Mine reported as a new mine in 1939 was located at the same location as the Schorsch mine reported from 1933 through 1936, or whether the 1939 listing refers to a new mine in a different location. The Schorsch Mine initially listed in 1939 apparently changed operators three times between 1939 and 1944. No listings were noted for this mine following 1944; it is not known if the mine ceased operations at about this time or if it ceased reporting following 1944.

Descriptive information pertaining to this mine is included in:

None

Notes:

Harrington (1934a) indicates that the Schorsch Coal Mine was located in T135N, R96W, Section 27; however, Harrington (1934a) provides no part section. Therefore, it is not known in which part section of Section 27 the Schorsch mine was located. Since three Planning Unit, AML locations (Planning Unit 026, AML locations 31, 43, and 30) include portions of Section 27, this mine has been included with all three Planning Unit and AML locations.

Schorsch Coal Mine (continued)

It is not known if the Schorsch mine reported from 1933 through 1936 and the Schorsch mine reported from 1939 through 1943 were the same mine at the same location or whether they were separate mines at separate locations.

The Havelock Coal Mine also is located at Planning Unit 026, AML location 31 (T135N, R96W, Section 27, NE, SW).
