Basic Data (excerpted from primary sources):

This mine is not listed as a new mine in 1922, and it may have been in operation prior to that time. The mine reported continuously from 1922 through 1942, when it is listed as "not operating." No listings were noted for this following 1942; it is not known if the mine ceased operations at about that time or if it continued to be operated, but was not reported.

Descriptive information pertaining to this mine is included in:

WCB Map: 1939

Notes:

This mine is not to be confused with the Havelock Coal Mine located at T135N, R96W, Section 27, NE (Planning Unit 026, AML location 31).

Sources containing information pertinent to this mine appear to indicate that the mine expanded from 1924 (see location 1 above) to 1937 (see location 3 above). The location provided in the 1926 CMID (west edge of the community of Havelock) is not specific enough to

Havelock Coal (aka Fuel) Co. (continued)

allow for definite placement of the Havelock Coal (aka Fuel) Co. Since the location included on the 1937 WCB map (location 3 above) includes the entire south half of Section 28, and Planning Unit 026, AML locations 28 and 29 each include a portion of the south half of Section 28, this mine has been included both with Planning Unit 026, AML location 28 and with Planning Unit 026, AML location 29.

The Havelock Quality Coal Co. (aka Quality Coal Co.) also is located at Planning Unit 026, AML location 28 or 29.

The New England Coal Co. also may be located at Planning Unit 026, AML location 28 or 29.
