Basic Data (excerpted from primary sources):

This mine is not listed as a new mine in 1926, and it likely was in operation prior to that year as evidenced in Leonard et al. (1925), which indicates that "Two mines, the Montgomery and the Brewster in sec. 35, T. 145 N., R. 84 W. are operating in a coal bed 8 feet thick." The mine reported production figures in 1926 and 1927, and in the 1927 CMID, the Summary of Inspection indicates that the Montgomery Coal Mine had caved. This mine is listed closed in 1928.

Descriptive information pertaining to this mine is included in:

Notes:

Leonard et al. (1925) indicate that the Montgomery Coal Mine is located at T145N, R84W, Section 35; however, Leonard et al. (1925) do not provide a part section. Therefore, it is not known if this mine was located at this Planning Unit and AML location (T145N, R84W, Section 35, NW), or if it was located in some other portion of Section 35.

The Elm Point Coal Mine also is located at this Planning Unit and the Brewster Coal mine may be located at this Planning Unit and AML location.
