No data	No data	10 ft.	CMID:1926

Basic Data (excerpted from primary sources):

In 1915, Chas. Semmler began developing an underground shaft mine,  
called the Black Diamond Coal Mine, in T144N, R88W, Section 25, NE,  
SW (near, but not identified by Planning Unit 066, AML location  
159--T144N, R88W, Section 25, SE, SW). M.M. Mounts purchased this

Knife River Coal Mining Co. (continued)

parcel of land in 1916, and in 1917 Mounts, Hughes, Pettibone and Little organized the Beulah Coal & Mining Company. This company became the Beulah Coal Mining Co. in 1918, and it apparently owned that portion of T144N, R88W, Section 25 on which the Beulah Coal Mine was situated from 1919 through 1922. The 1918 SEBR indicates that a "power house is situated at the mine and all main haulage ways are electric lighted," and two water pumps used in the mine were driven electrically. Additionally, the mine was entered by a two-compartment shaft--one compartment contained a stairway and the other a hoist--and a ladder was provided in the mine's air shaft. From 1918 through 1919, the mine produced coal from the upper vein of coal. In 1920 an attempt was begun to mine a lower vein of coal, because the upper vein was nearly exhausted and the mine was experiencing water problems at this level. From 1921 through 1922, the mine produced coal from the lower vein; however, in 1921 the mine was condemned, because of poor ventilation, inadequate timbering, and water problems. No listings were noted for the Beulah Coal Mine following 1922.

The Knife River Mining Company organized in 1922, taking over the Beulah Coal Mine buildings and apparently the power plant operated by the Beulah Coal Mine, and began operating a mine in T144N, R88W, Sections 12 and/or 13 in 1923. A WCB map indicates that the mine had extended into T144N, R88W, Sections 12 and 13, and T144N, R87W, Sections 7 and 18 by 1926. It is not known when or if the Beulah Coal Mine power plant ceased operations; however, the Hughes Electric Company built a power plant at Beulah in 1925, which was supplied coal by the Knife River Mining Company. Since electric equipment was used in the mine, it is possible that the Beulah Coal Mine power plant remained in operation to supply the mine's electricity. The Hughes power plant eventually supplied electricity to Beulah, Mandan, Bismarck, to communities from Beulah to Kildeer, and to communities from Beulah to Dickinson. Montana-Dakota Utilities purchased this plant in 1945, and constructed the Dakota Station under agreement with Dakota Electric Cooperative, Inc. (a group composed of 14 Rural Electric Association Cooperatives in North Dakota and South Dakota). At about this time, the power plant began to supply electricity to electric cooperatives as well as to communities.

In 1952, the Knife River Mining Co. began a stripping operation, presumably in T144N, R88W, Sections 7 and 18; the company operated both the underground and the strip mines in 1952 and 1953, when the underground operation was closed. By 1954, the stripping operation included T144N, R87W, Sections 16, 17, 20 and 21, and by 1960 it extended into T144N, R87W, Sections 8 and 9. In about 1963, a new unit was developed south of the community of Beulah (presumably in T143N), which eventually extended into Oliver County--this unit apparently became known as the South Unit, while the areas-in T144N became known as the North Unit. CMID production figures from 1965 through 1974 include the combined production of both the North and South units of the mine. According to a 1965 WCB map, the North

Knife River Coal Mining Co. (continued)

unit of the mine had extended into T144N, R88W, Sections 5 and 6 by that time, and it is assumed that the mine extended into Section 4 at some point following 1965.

Descriptive information pertaining to this mine is included in:

Notes:

The portion of the Knife River Mining Company mine included in that area recorded as cultural resource site 32ME574 includes T144N, R88W, Section 25; NE, SE, W1/2; NE, SW, E1/2; and SE, NE, NW. This area contains related mine and power plant structures, and at least portions of the abandoned underground Beulah Coal Mine; however, it is not identified by any Planning Unit or AML location.

The Kessler Coal Mine also is located at Planning Unit 064, AML location 149 (T144N, R88W, Section 12).
