Basic Data (excerpted from primary sources):

This mine is not listed as a new mine in 1917; the 1918 SEBR indicates that the mine "is operated during the winter months to supply a local demand," which appears to indicate that the mine had been in operation prior to 1917. The mine was operated and reported in 1919; however, no listings were noted following that year. It is not known if the mine ceased to operate, if it was operated and not reported, or if it was operated and reported under some other name.

Descriptive information pertaining to this mine is included in:

[source:year(pages)]

SEBR:1918 (156)

Notes:

Discrepancies exist in the 1918 SEBR as to what type of mine this was. Some listings indicate that the mine was a strip mine, and other listings indicate that the mine had a single entry, which suggests that the mine was an underground mine. If overburden at the mine was in fact 75 ft., it appears more likely that the mine was an underground mine. However, no information was noted to indicate definitely what type of mine this was.

The Olson Coal Mine and the Common Coal Mine also are located at this Planning Unit and AML location.
