Basic Data (excerpted from primary sources):

This mine had been in operation for some years prior to 1909, as indicated in the 1910 SEBR: "Stripping has been carried on here for some time, but the increasing thickness of the overburden necessitates the undermining, which has just been begun, the main entry being some ten feet in." No listings were noted for this mine following 1909, nor was information noted that indicated that the mine had closed. Therefore, it is not known if the mine ceased operating or if it was operated but not reported following 1909.

Descriptive information pertaining to this mine is included in:
