

2011 Jan 24

320Lx113 is located in T141N R83W, Section 21 and 28. The site was previously recorded as a site lead in 1990. See BNI 28 for additional information.

BNI 28 is located in T141N R83W, Section 21 and 28. The current landowner, Tony Pflieger, mentioned his Russian born Grandpa bought the land. The land has since been passed down through the family. Anton, now 79, remembers his father and him mining coal when Tony was 10 years old.

The family used the coal to heat the house every winter. They used a scraper and horses then hauled it home. Tony's grandpa mined the area before Tony was born. The family quit mining the coal when Tony was about 12, or in 1943. The mine is connected to 320Lx113 and three additional abandoned mines are to the north (outside of Ethnoscience's project boundary).
