Basic Data (excerpted from primary sources):

This mine is listed as a new mine in 1929. Apparently, the original intention was to mine this mine as a drift mine; however, from 1930 through 1937, the mine is listed as a slope mine. The mine is listed "not operating" in 1937, and no listings were noted following that year. It is likely that the mine ceased to be operated following 1937; however, it also is possible that the mine was operated but not reported or that the mine was operated and reported under some other name following 1937.

Descriptive information pertaining to this mine is included in:
