Basic Data (excerpted from primary sources):

This mine is listed as a "new mine" in 1925, and therefore it is likely that the mine began operations in that year. The mine was changed to a surface (strip) mine in 1933. In 1936 a new slope (entrance) was developed and the mine again was operated as an underground, slope mine, under the name white Butte Coal Mine. The mine is listed as "not operating" in 1941, and it is assumed that the mine ceased operations at about that time; however, it is possible that the mine was operated but not reported or operated and reported under some name following 1941.
