

It will be noted on the map that the Fort Union extends eastward many miles on the upland between the Cannon Ball and Heart rivers, and as usual the formation contains coal. A bed 4 to 5 feet thick has been mined on a small scale in secs. 2 and 11., T. 133 N., R. '88 W. A higher coal bed is mined near the north line of sec. 7, T. 133 N., R. 87 W. This varies in thickness from 4 to 6 feet and has been worked for several years by stripping off the cover
