Basic Data (excerpted from primary sources):

The 1924 CMID indicates that the "Roseglen City Mine should be added to the Fifth Annual Report [1923 CMID]." Neither the 1923 or 1924 CMID reports provide production figures for this mine, and it appears that the mine began operations sometime in about 1923. The mine is reported continuously from 1925 through 1937, when it is listed as not operating. No reports were noted for the mine following 1937; it is not known if the mine ceased operations at about that time, or if it was operated and not reported. It should be noted that the Bureau of Mines (1948) reports data recorded about this mine in 1934, at which time the life of the mine was estimated to be 10 years. Ten (10) years from 1934 would be 1944; however, as indicated no reports were noted following 1937.
