Basic Data (excerpted from primary sources):

This mine is not listed as a new mine in 1913, and it may have been in operation prior to that time. The 1916 SEBR indicates that "Most of the mining is done in the fall of the year." The mine was operated and reported continuously from 1913 through 1920; the 1920 CMID indicates that the mine "was not in operation on my last inspection." The mine was operated and reported again in 1921; no listings were noted following 1921. It is likely that the mine ceased to be operated following 1921, as indicated in Leonard et al. (1925), which states "This mine has not been operated for several years." It should be noted that Leonard could have been in the area as early as 1920 or as late as 1925.
