

*The Norstrom & Rinos Mine*, Township 156, Range 86, Section 32.—The seam in this mine has the same thickness and peculiarities as in the Lloyd mine. It is ten feet thick, has the clay layers in the same relative position, and is mined in a similar manner.

Two or three men are employed here during the summer, and from ten to fifteen during the winter. About 180 box cars of twenty-five tons each are shipped from the mine annually.
